

Words cannot describe it Vision Can

Try describing a butterfly to someone who has never seen it. You will probably speak about the myriad colours; the textured wings and the intricate patterns. Suddenly, you find that words are not enough. You simply cannot convey the image of a beautiful butterfly. That is when you realise that sight is a precious gift

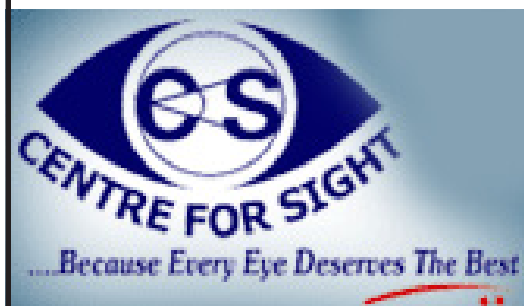

At Centre for Sight (CFS), our intent is clear: To establish the most preferred brand of super specialised eye care centres in North India...because every eye deserves the best. We believe in patient satisfaction and are constantly working towards improving our services. The latest in technology, the

best infrastructure, the most experienced doctors and a commitment to quality underscore all our activities. We have six centres, which are open even on Sundays. CFS is recognised by the Central and Delhi Government Health Schemes and registered by the Directorate of Health Services, National Capital Region,

New Delhi. We are on the panel of reputed public sector undertakings, multinational corporations, insurance companies and embassies. Driven by a passion to provide the best eye care in the world, we ensure that no eye goes unprotected. For, your vision is our reality.
