

When I came to the Centre for Sight, I had serious pains in my right eye and I could not see with the right eye at all. Now that my right eye has been operated, with a view to correcting my defective lens which was badly fitted in Nigeria, I can now see ^{and read} with my right eye without experiencing any pain.

With regards to human relations, all the doctors I had contact with were very cordial, and efficient. I am impressed about the way I was treated. The human relation of all the staff I came in contact ^{with} was fantastic especially Mr Rahi who took me to all the doctors that treated my case. I am very happy with the services of the Centre for Sight.

Patient's name :- Mr Tunaid, Akanni Yahaya
